

UNIT 2: MY COUNTRY

Inquiry 1: How do we interact with our local environment?

Part 3

Activity Sheet:

MC1.4 - Bush Tucker/Medicine Research

1. View

Watch the *Wadu Matyidi* animation and the Mini Doc: *Walking Our Country - Yarta Mandaawi Widniarlpurla*.

2. Explore Bush Tucker and Bush Medicine

Read the Bush Tucker and Bush Medicine Glossary with your class. These are the plants and animals that you will be representing in your very own class 'D.I.Y. Museum'.

Once you've been allocated a word from the Glossary representing the item for which you will need to undertake research, use the questions in your Bush Tucker/Medicine Research sheet to help you research and record information about your item. You might like to use the Internet or your local library as your information source. Try and find an image or photo to accompany your answers. If your item is native to your local area, you might even be able to find a specimen to include in the museum!

3. Create a Museum Display

Once you've completed your research and it's ready for display, work with your classmates to find the best way of sharing the information, pictures and any other objects. When it's done, host an exhibition opening to share your findings with other students at the school.
